In the manuscript by RAÚL VINET, MAGDALENA CORTÉS, MARIO LUXORO and MARCO A. DELPIANO, entitled: "Nicotine-evoked cytosolic Ca^{2+} increase and cell depolarization in capillary endothelial cells of the bovine adrenal medulla" published in Biol Res 42: 1, 2009, in page 115, Fig. has been replaced by the following figure:

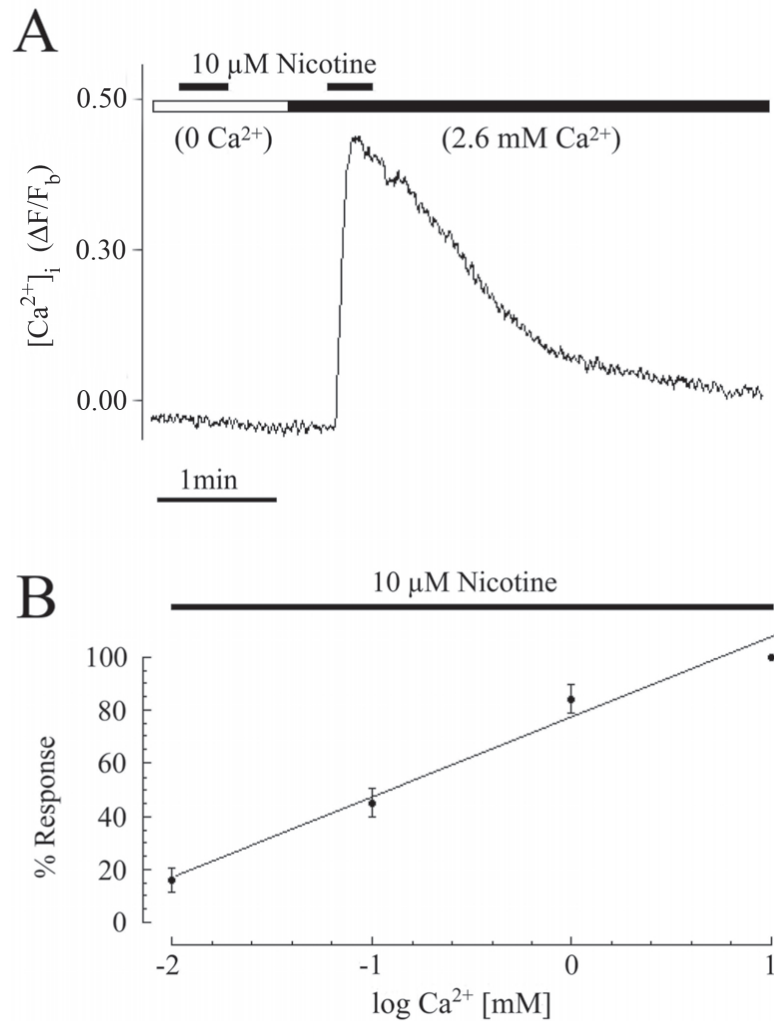

Figure 3: The nicotine-induced $[\text{Ca}^{2+}]_i$ increase in BAMCECs is dependent on extracellular Ca^{2+} concentration. **(A)** Representative recording of $[\text{Ca}^{2+}]_i$ changes induced by 10 μM nicotine in a nominal 0 Ca^{2+} concentration and when 2.6 mM Ca^{2+} was restored in the medium (n=6). **(B)** Dose-response curve of 10 μM nicotine at different external Ca^{2+} concentrations (0.01-10 mM).
